THE 2018 QS WORLD UNIVERSITY RANKINGS BY SUBJECT WILL BE LAUNCHED ON THE 28 FEBRUARY 2018

www.topuniversities.com

WELCOME 2018 QS WORLD UNIVERSITY RANKINGS BY SUBJECT

Welcome to your institution's summary fact file for the QS World University Rankings by Subject 2018.

This file provides the ranks and scores for your institution in the subjects that you have been ranked in. It should also provide you with useful information for any media communication you might need to prepare prior to launch.

To produce the rankings for this year the team analysed over 22 million papers, producing close to 200 million citations. 1,130 institutions have been ranked across 48 subjects in 5 subject areas, creating 14,000 published entries. These figures reflect some of the scale behind this huge undertaking that the team carries out in order to produce these subject rankings.

The first section contains an "at a glance" summary of your institution's performance across the board in all the subject areas covered. The wheel chart is a graphical representation – brightly coloured bars indicate that you have achieved a score in that subject; the longer the bar the higher the score you have attained. A pale bar in a subject area indicates your performance in the broad subject area.

The next table shows a summary of your scores and ranks in all the subjects you have been ranked in.

There is also an Appendix explaining the evolution of the subject rankings, the paper thresholds that we have used in this edition and an indication of the number of institutions considered and ranked.

I hope you will find this useful but we have also prepared a more extensive EXTENDED FACT FILE for you, presenting your institution in context, subject by subject, indicator by indicator in greater depth. Please go to www.iu.qs.com/extendedfactfile to file a request and the team will aim to get back to you within a couple of days depending on the volume of requests.

Ben Sowter

Director, QS Intelligence Unit

Boston, USA June 18th -19th

HigherEd Data:

Opportunities and Challenges

How to get the most business value from your data, making your university a more innovative, competitive and data-driven organization.

Early-bird tickets available now: www.edudatasummit.com

*Book now and get a complimentary-guided tour around the MIT campus

Main Guest Speaker

Meet **DJ Patil**, the most influential data scientist in the world and very first Chief Data Scientist of the US Government, who will be speaking on how to make data-driven, informed & strategic decisions in companies.

*Book now and get a personalized one-on-one session with our Rankings Analysts. This session will provide you with all the insights on your current rankings, and will give you comprehensive and practical advice on understanding what the rankings data is telling us.

QS Rankings Summit

Taking place on the **20th June**, this is a unique one-day workshop in which industry experts will provide insights on how to maximize an institution's potential measured by the QS methodologies used to create the QS World University Ranking and the QS World Rankings by Subject.

NATIONAL AND KAPODISTRIAN UNIVERSITY OF ATHENS AT A GLANCE

RANKED IN 5 BROAD SUBJECT AREAS

SCORED IN 35 SUBJECTS

RANKED IN 11 SUBJECTS

2018 QS WORLD UNIVERSITY RANKINGS BY BROAD SUBJECT AREA

NATIONAL AND KAPODISTRIAN UNIVERSITY OF ATHENS

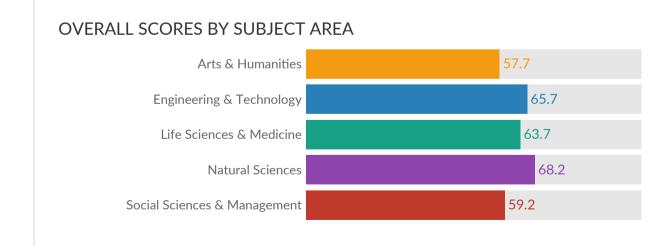

Greece

These are the ranks achieved by the institution in the QS Rankings by Broad Subject Area.

In 2018, National and Kapodistrian University of Athens has been ranked in 5 out of 5 broad subject areas.

Life Sciences & Medicine is the institution's strongest field at 241= and an overall score of 63.7.

Below is the institution's detailed performance by indicator and overall across the 48 subjects currently featured in the QS World University Rankings by Subject. It is very unusual for an institution to qualify for consideration in all 48 subjects.

		Overall Score	Academic	Employer	Citations	Н	RANK
	Arts & Humanities	57.7	56.5	59.2	78.5	40.8	392=

NOTES:

There are a different reasons why an institution may not have results in any given subject.

- 1. It may not offer a program

- 2. It may not have published a sufficient number of papers
 3. It may not have attracted a minimum level of recognition through our surveys.
 4. Receiving a score for a particular subject does not guarantee that we have checked for its presence in your institution. These checks are only carried out for institutions with a score high enough to receive a published rank in the subject.

The tables below present the rank evolution in each evaluated subject for the institution.

APPENDICES

DEFINITIONS,
WEIGHTINGS, THRESHOLDS
AND HEADLINE FIGURES.

METHODOLOGY: DEFINITIONS & WEIGHTINGS

ACADEMIC REPUTATION

Between 2013 and 2017 QS has collected votes from over 170,000 academics in 60 countries around the world. Each academic counted has given their opinion on universities in their fields of expertises.

EMPLOYER REPUTATION

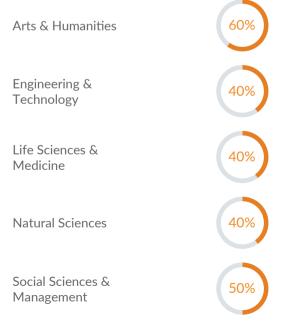

The employability metric is based on employer reputation. 158,000 global employer votes have been taken into account between 2012 and 2017 giving us a large pool of information in terms of hiring levels. Employers across all sectors and industries have taken part in the survey and include Facebook, Google, Uber, Wells Fargo, Bank of America etc.

CITATIONS PER PAPER

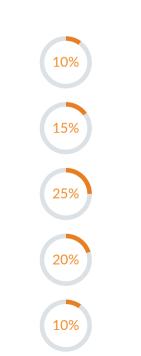

This ratio measures the average number of citations obtained per publication, and is an estimate of the impact and quality of the scientific work done by universities. To avoid anomalous results, only the institutions producing a minumum number of papers in the last five years are evaluated.

H-INDEX

The h-index is an index that attempts to measure both the productivity and impact of the work published by the insitutions' scientists and scholars. The index is based on the set of the institution's most cited papers and the number of citations that they have received in other publications.

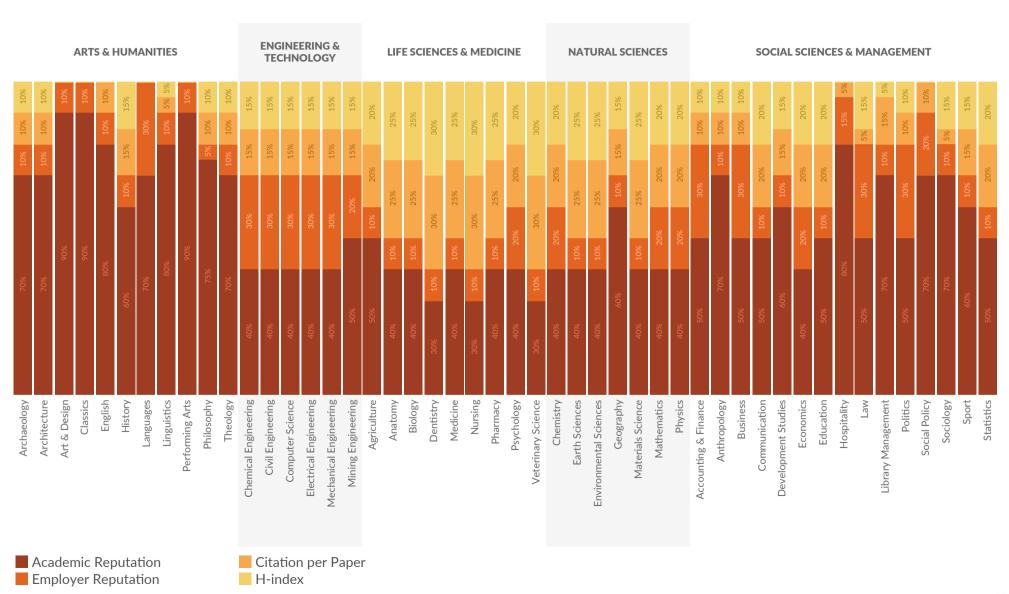

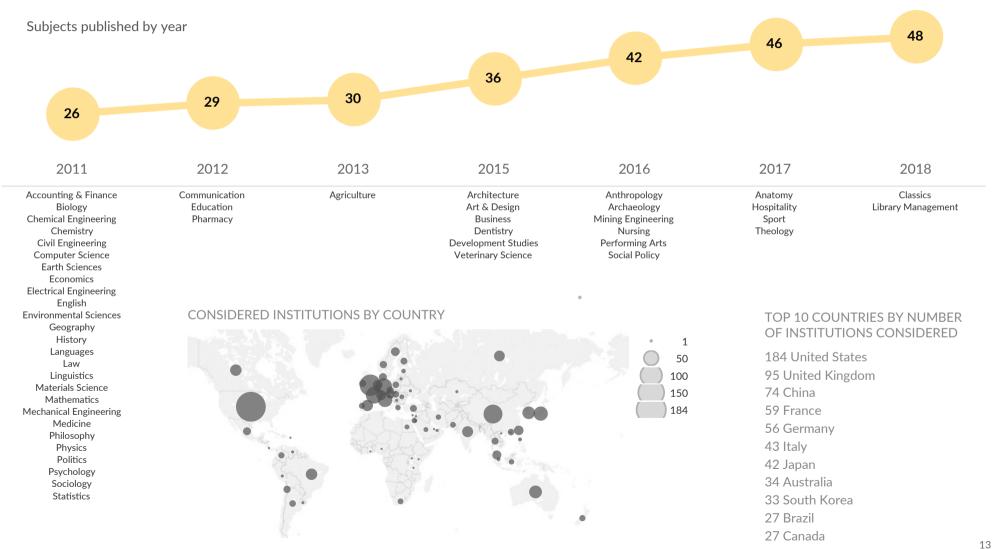

We use a variable approach to the weightings for the different subjects. The chart below provides details of the combinations used in the 2018 edition of the rankings.

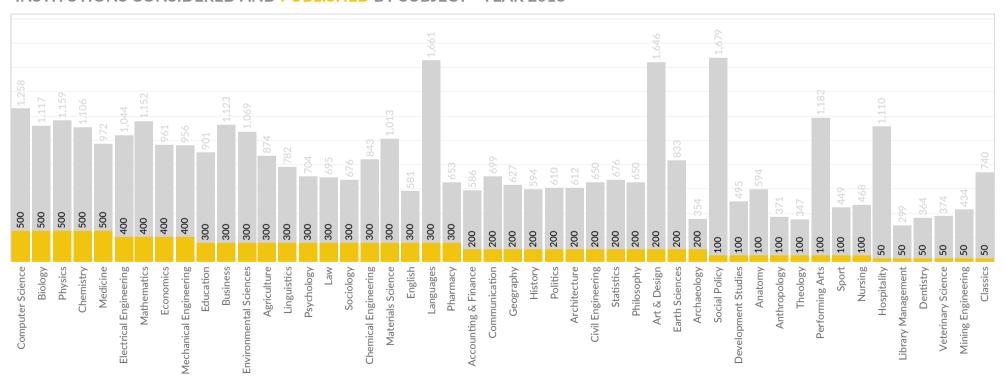

The QS World University Rankings® by Subject ranks the world's top universities in individual subject areas, covering 48 disciplines as of 2018. A list of the considered subjects, grouped by the year of first release, is presented below.

The charts below present the number of institutions considered and published in each of the relevant subject areas.

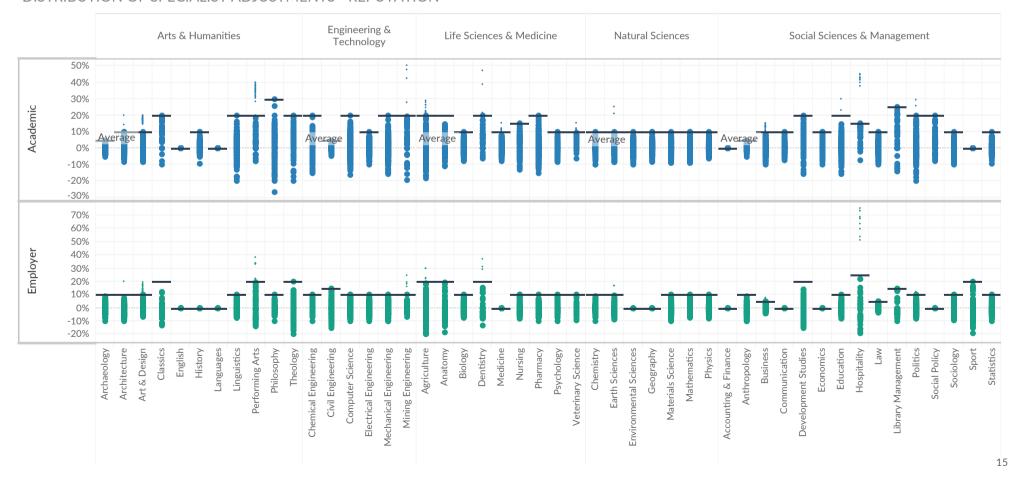

Subjects	Countries	Institutions
48	151	1130

INSTITUTIONS CONSIDERED AND PUBLISHED BY SUBJECT - YEAR 2018

In the QS Subject Rankings methodology, a specialization adjustment is applied to the original reputation scores in order to boost the performance of those institutions that present a stronger focus in specific subjects. The original rank calculated for each subject is compared against the rank obtained in the relevant broad subject area containing the said subject according to the QS mapping. For example, the results in Biology are compared against the overall rank in Life Sciences & Medicine. Whenever the rank difference between the subject and the broad area exceeds five places, a positive or negative adjustment is applied in the Reputation score. The method compares the proportional difference for each institution against the maximum and minimum recorded globally. The maximum change cannot exceed the percentages presented in the chart below.

DISTRIBUTION OF SPECIALIST ADJUSTMENTS - REPUTATION

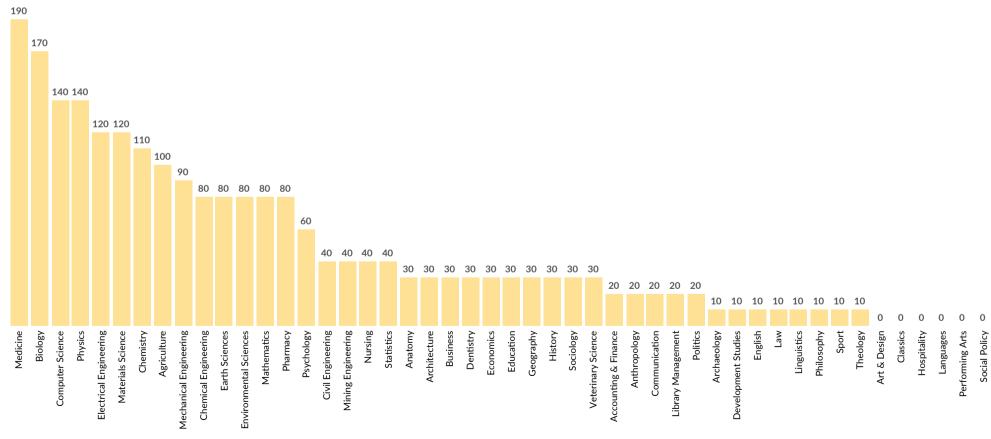

In order to feature in any discipline table, an institution must meet three simple prerequisites:

- Offer undergraduate or taught postgraduate programmes in the given discipline
- Exceed the minimum required score for the academic and/or employer reputation indicators
- Exceed the five-year threshold for number of papers published and indexed by Scopus in the given discipline

The following chart discloses the minimum number of papers required to be considered in the latest edition of the rankings by subject.

PAPER THRESHOLD BY SUBJECT - YEAR 2018
MINIMUM NUMBER OF PUBLICATIONS INDEXED BY SCOPUS REQUIRED TO BE CONSIDERED IN THE RANKINGS.

DATA ANALYTICS • QS STARS RATING • CONSULTING SERVICES

Turn data into insight to boost your position in rankings by:

Understanding and optimizing your reputational strategy

Identifying and maximizing existing strengths

Implementing frameworks for performance improvement

Enhancing your branding among prospective stakeholders

Improving your visibility and connections in key markets

Developing a sustainable and high-impact global strategy
